Montreuil, 7th November 2022

Note to operators

Objet : **Smart Border Logistics Envelope - New version released on 7th November 2022**

Please note that a new version of the smart border logistics envelope will be released on 7th November.

From this date, and in order to further secure the SI Brexit-ICS process, economic operators can now include in the logistics envelope the references of the Entry Summary Declarations (ENS) attached to the transport unit with which the logistics envelope is paired.

It should be noted that the addition of ENS in the logistic envelope is only possible for logistics envelopes intended for import flows (EI + 5 characters format).

For these cases where the ENS are integrated into the logistics envelope, the pairing stage allows verification, via a call to ICS, of the existence and status of the ENS and its attachment to the transport unit.

The regional Customs and Excise Economic Action Centres (Pôles d'action économique – PAE) are at your disposal for any further information.

Head of the Mission 'Smart border and logistics',

Caroline Cardenas Caroti
